DISTRIBUTION®

Aftermarket Centers of Excellence

Local Service, North American Standards

Eaton has established five regionally located Aftermarket Centers of Excellence (ACE) in North America to perform its Class 1 Reconditioning process. Each ACE strictly adheres to a national program of standards and quality processes, thus assuring customers with multiple sites that all their breakers will be Class 1 Reconditioned exactly the same. Eaton's POWR-Master database also provides a complete maintenance profile on each breaker instantly accessible to the Engineering Service technicians enabling Eaton to respond more effectively to service requirements.

Committed to the Installed Base

Eaton offers full support to all low voltage and medium voltage circuit breakers regardless of original manufacturer. Eaton's dedicated Aftermarket Organization provides the highest quality and most in-depth service in the industry today.

- Full line of NEW replacement components and renewal parts are available
- Eaton-trained technicians dedicated to reconditioning power distribution equipment
- Centralized national database of all test data
- Fully implemented quality procedures
- Detailed reconditioning down to the nut and bolt as well as original oil and lubrication specifications

Eaton's Class I Reconditioning

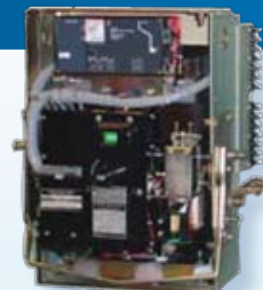

Who better to recondition vintage power circuit breakers and restore them to near new operating condition than a world leader in breaker engineering and technology?

- Increases the life of the breaker
- Improves system reliability
- Enhances coordination

BEFORE

AFTER

Satellite Manufacturing Facilities

Do you know what to do in case of an electrical emergency?

Eaton's Satellite Manufacturing Facilities deliver standard or custom Cutler-Hammer branded assembled panelboards, switchboards, and enclosed circuit breakers when you need them the most. Our highly trained and experienced personnel will manage your order and ensure that you receive on-time delivery of high-quality equipment that meets your specifications.

- Quick ship or direct pickup
- Customizable, design-build, retrofit solutions
- Direct local contact with the manufacturers

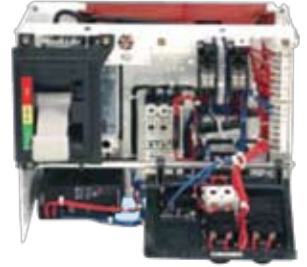

Our nationwide network of Satellite Manufacturing Facilities can provide your electrical emergency solution.

- Panelboards: From one to five days
- Switchboards: Between five and ten days
- Assembled Enclosed Circuit Breakers: From one to ten days

Service Centers

One of the most unique aspects of Eaton's Network of MCC Service Centers is the ability to provide customized products to meet delivery requirements.

- UL® Listed replacement starter and feeder buckets
- Upgrades to most current control and circuit protection technology
- Genuine renewal parts
- Add-on structures
- Designs compatibility for several manufacturers' MCCs

Electrical Services & Systems

Eaton's Electrical Services & Systems (EESS) team is uniquely positioned to offer advanced, product-based solutions to support your design, engineering, construction, start-up, modernization and specialty needs. As part of these services, EESS provides ground fault testing and ground resistance testing to ensure the best performance from your existing power system.
