

How to Use This Catalog

All products in this catalog fit into one or more of seven WESCO Green Categories. Additionally, products may also be certified as having passed recognized industry standards or as being guideline compliant.

Visual aids are placed throughout the guide to aid in the identification of green product categorization and certifications. You will find these aids within a legend riding along the topmost border of each product page (*see example below*).

Green Certifications & Guidelines

Products within this catalog may meet any of the following certifications and/or be guideline compliant. If one of the logos **below** appears at the top of a product page, look for the bulleted description to identify which specific product has met these criteria.*

LEED®

LEED®

Some or all of the products on the page can contribute credits towards the Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ certification process, developed by the US Green Building Council

ENERGY STAR®

Some or all of the products on the page meet strict energy efficiency guidelines set by the EPA and U.S. Department of Energy

Federal Energy Management Program

Some or all of the products on the page qualify as those that promote energy efficiency as designated under the Federal Energy Management Program.

Title 24

Some or all of the products on the page conform to California Building Standards set forth in Title 24 of the California Code of Regulations.

NAHB Green Home Building Guidelines

Designed to be a tool kit for the individual builder looking to engage in green design and construction processes, and assists the builder toward incorporating more green building features into homes

RoHS Compliant

Some or all of the products on the page are manufactured without using the following materials: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls, and polybrominated diphenyl ethers

WESCO Green Categories

Products will fall into one or more of the following categories. If one of the following logos appears at the top of a product page, then products on that page qualify as per the definitions provided **below**.

Energy Savings

Some or all of the products on the page help reduce electrical usage and/or increase electrical efficiency

Conserves Water

Some or all of the products on the page promote water conservation by using water more efficiently in the product's application.

Waste Reduction

Some or all of the products on the page help eliminate waste through their application and/or packaging.

Harmful Chemicals Removed

Some or all of the products on the page have been manufactured/produced with a reduction and/or elimination of harmful chemicals (such as volatile organic compounds, etc.)

Recycled

Some or all of the products on the page are manufactured using post-consumer recycled materials and/or materials that can be recycled after use.

Environmentally Friendly

Some or all of the products on the page are friendly to the environment — through manufacturing or usage

Environmentally Friendly System

Some or all of the products on the page are friendly to the environment when used in combination with other products or systems, i.e., wind turbines
