

# FiberGuide® Design Pro

CommScope introduces FiberGuide® Design Pro - a configuration tool that allows users to import layouts into a web-based tool, design desired raceways in a 3D format, and export detailed drawings and BOMs that can be used for easy installation and ordering.

- Provides users a clear view of how the raceway should look once fully installed
- Contains smart-build features that auto-calculates the number of junctions and supports needed, along with support placement recommendations to get users to the design they need
- Provides BOMs with increased accuracy and a 3D visual layout to increase confidence in the design/layout
- Replaces the C-BOM tool

**Availability: October 13<sup>th</sup>**

Get started today!

Getting access to FiberGuide Design Pro is easy, just follow these steps:

**Login**  
You must be [logged into My CommScope](#).

  
**Login**

If you do not already have an account, [register here](#).

**Select the application**  
Look for the FiberGuide Design Pro tile in your list of applications.

  
**FiberGuide® Design Pro**  
FiberGuide® configuration tool that produces raceway layouts in 2D and 3D PDFs along with a BOM for easy ordering.

**Request Access**  
If you do not see the tile on your My CommScope Applications screen, select the **Request Access** option near the top of the page, and select **FiberGuide Design Pro** from the list.
