

EV Charging

Growing Demand = Growing Opportunity

Why install EV Charging Stations?

- Growing demand for accessible & convenient EV Charging stations due to increasing sales of fully Electric Vehicles
- Increase value to current customers, tenants & residents
- Expand market share to this consumer base
- Possible tax advantages to your business
- Easily add your business to special maps that electric car drivers utilize to plug in & charge

Why partner with WESCO Energy Solutions?

- Evaluation, design & installation of your EV charging systems
- One (1) year of complimentary cloud service
- Leverage available rebates & incentives
- Fully developed installation footprint for support in the U.S. & Canada
- Experience working across all major markets & industry spaces
- Customized solutions to maximize the value to your business & customers

Interesting EV Facts:

- 1+ million EVs currently on U.S. roads
- 2/3 of potential EV owners listed ease of finding charging stations as a key factor in completing the purchase
- EV customers spend 2x more time shopping when they can conveniently plug in

Benefits of EV Charging stations:

- Attract EV owners to your business/local area
- Increase occupancy rates & lease value for tenants
- Support sustainability & carbon emissions programs
- Increase customer dwell time
- Increase customer loyalty & return business with preferred parking locations
- Simplify “the choice” for Electric Vehicle owners and differentiate your business

Boost your property value & get plugged in to new customers with EV Chargers.
