

World-class project execution

From the initial survey of your industrial facility to our final commissioning, WESCO Energy Solutions (WES) delivers the necessary, tightly-integrated, value-added services and deep expertise to make your project a resounding success. The entire process is streamlined to be as simple as possible and is designed to deliver fast results.

SURVEYS & AUDITS

We specialize in Investment Grade Audits that allow us to create the most energy efficient design possible.

SYSTEMS DESIGN

We provide a fully realized system design. Solutions and proposals include photometric analysis, 3-D rendering and CAD layouts.

LIGHTING CONTROLS

We develop, design and commission lighting management and building management systems, as well as provide mandatory building integration and perform electrical evaluation.

REBATES

We research available rebates and incentives, tailor the project to maximize funds, and deliver a projected total. We manage the paperwork and approval process to secure all projected funds.

REGIONAL CONTRACTOR MANAGEMENT

We have an in-house team of installers supplemented by a network of qualified partners to perform ISN-compliant system installations. We ensure efficient work, clear access and daily progress reporting through ongoing supervision.

REGULATIONS & CERTIFICATIONS

We secure the required certificates, licenses and permits and stay current on all new legislation, codes and statutes affecting the project. When we provide recycling as a value-added service, we can provide certificates of recycling.

FINANCE

Our investment analysis incorporates rebates and incentives, indicating the cost of ownership and expected energy and maintenance cost savings of our strategies. We can also help customers get financing through third-party lenders.

CUSTOMER SERVICE

We offer warranty management and support services including maintenance, customized reporting, summary invoicing, remote monitoring and retrocommissioning of energy monitoring and management systems.

SAFETY MANAGEMENT

We monitor safety compliance reporting and training throughout the country, as well as the safety performance of our subcontractor network.

PURCHASING

Our “product-agnostic” approach lets us specify the best products and materials from a wide range of manufacturers at the most competitive pricing.
